

# DIGITIZE Assessments

## A Wearable Digital Health Technology Study

In DIGITIZE, participants wear wrist and ankle sensors that track movement, walking, and daily activity at home. This gives researchers a new way to measure ALS progression outside the clinic.

### Are you eligible?

- Actively participating in either the ASSESS or PREVENT ALL ALS study.
- Participant's site is involved in DIGITIZE.
- Able to stand and take at least a few steps with or without an assistive device.

### Why Participation Matters:

Researchers can use digital health information to learn more about ALS and better understand the effect of treatments.

### Participate!

*To learn how to get involved, visit the ALL ALS website or speak with your ALL ALS study team.*
